

Student Assistant (m/f/d) in Robot Programming wanted at the next possible date

Our Profile

We are an internationally oriented chair that focuses on topics at the interface between innovation, human resource management and technology. With the aim of combining high scientific standards with practical relevance, we develop our teaching and continuously carry out exciting research projects.

Your Tasks

We are looking for student assistants to support us in the maintenance and continuous development of our robots.

Exemplary areas of activity may be:

- * Work with various autonomous robots such as Pepper, Zenbo and our android robot Elenoide (<https://www.youtube.com/watch?v=EU44rXOdL5Y>)
- * Support of the maintenance and further development of the robotics park of the department

Your Profile

If the following characteristics apply to you, you are exactly right in our team and we are looking forward to your application!

- Solid knowledge of C++ and Python
- Basic knowledge of ROS
- Enthusiasm for robotics and new technologies
- Creativity and openness for innovative ideas
- High resilience and flexibility
- Ability to work independently and in a structured manner

Are you interested?

If so, please send your application documents (including a letter of motivation, curriculum vitae and current transcript of records) to:

„Franziska.Wolf@bwl.tu-darmstadt.de“.

We are looking forward to your application!
