

<b>Topic</b>	<b>Intergenerational differences in terms of employee work-life-balance</b>
<b>Overview</b>	<p>A generation of young employees is currently growing up with constant availability and increasing work from home. The primary research question deals with how young and older people differ in terms of their work-life balance? Which different preferences can be identified? How do they deal with the same demands? What different resources do different generations have?</p> <p>The main focus can be defined individually with the supervisors.</p>
