

Preferred Partnership Network

Univ.-Prof. Dr. Dr. Ruth Stock-Homburg
Technical University Darmstadt

Agenda

- » What are we interested in?
- » Who are we?
- » What are our core competencies?
- » What do we offer within the cooperation?
- » How can you prepare for the future?

WHAT ARE WE INTERESTED IN?

Our Interests

Shaping the future of work together with the Preferred Partnership Network

- » As a future-oriented chair we want to be prepared for the future. In doing so, we attach great importance to innovative research. Within the Preferred Partnership Network, we would like to pursue this goal together with companies by dedicating ourselves to research into the future of the working world. In doing so, we derive research questions together with our partner companies so that they are tailored to the company. Our research interests cover a broad spectrum:
 - How should the future of the working world be shaped for your company?
 - How can digitalization be realized in your company?
 - Is the use of robots worthwhile in your company?
 - How can the use of robots be realized in your company?
 - What does Data Privacy by Design mean for your company?
 - How can the work-life balance of your employees be improved?
 - ...
- » And what are you interested in?

WHO ARE WE?

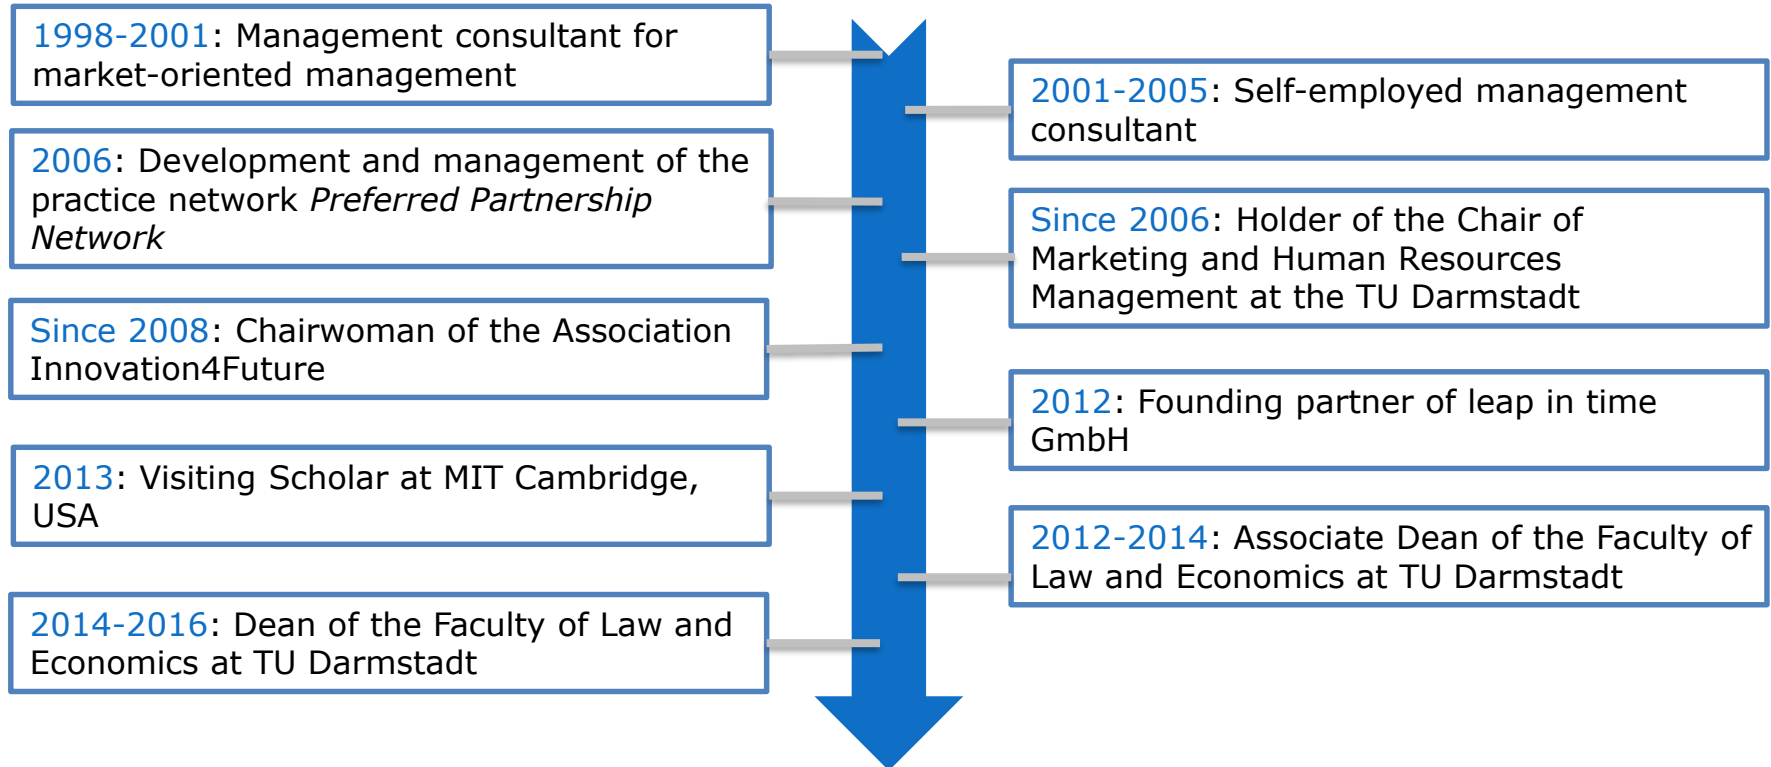

Prof. Dr. Dr. Ruth Stock-Homburg

- » **Degrees** in business administration and psychology
- » **Dissertations** on the relationship between employee and customer satisfaction and human-robot interaction
